The Directors do not recommend the payment of any dividend for the year ended 31 December 2019 (2018: Nil).

The calculation of the basic and diluted earnings per share is based on the profit attributable to owners of the Company of approximately HK\$68,612,000 (2018: profit of approximately HK\$42,383,000) and on the number of 1,712,329,142 ordinary shares (2018: 1,712,329,142 ordinary shares) in issue during the year.

The calculation of basic and diluted earnings per share attributable to owners of the Company is based on the following data:

	2019 HK\$'000	2018 HK\$'000
Profit for the year attributable to owners of the Company	<u>68,612</u>	<u>42,383</u>

The finance lease receivables are secured by the leased assets, mainly plant and machinery, as at 31 December 2019. The Group is not permitted to sell or repledge the collaterals of the finance lease receivables without consent from the lessee in the absence of default by the lessee.

12. FINANCE LEASE RECEIVABLES (Continued)

Estimates of fair value of collaterals are made during the credit approval process. These estimates of valuations are made at the inception of finance lease, and generally not updated except when the receivable is individually impaired. When a finance lease receivable is identified as impaired, the corresponding fair value of collateral of that receivable is updated by reference to market value such as recent transaction price of the assets.

Security deposits received from customers as at 31 December 2019 represent finance lease deposits received from customers which will be repayable by end of the lease period of the respective finance leases. Deposits of HK\$56,874,000 (2018: HK\$21,315,000) have been received by the Group, in which deposits of HK\$13,076,000 (2018: Nil) were classified as current liabilities and the balance were classified as non-current liabilities, based on the final lease installment due date stipulated in the finance lease agreements. All deposits are non-interest bearing.

All finance lease receivables at the end of the reporting period are not past due.

13. TRADE AND OTHER RECEIVABLES

In determining the recoverability of a trade receivable, the Group considers any change in the credit quality of the trade receivables from the date credit was initially granted up to the end of the reporting period. The concentration of credit risk is limited due to the customer base being large and unrelated.

As at 31 December 2019, none (2018: approximately amounted to HK\$26,000) of the trade receivables over 120 days was impaired.

CHAIRMAN'S STATEMENT

BUSINESS REVIEW

For the year ended 31 December 2019, the Group recorded total revenue of HK\$161,107,000, another significant increase of 102.5% year-on-year. Such significant increase was attributable to the increases in operating income of approximately HK\$55,310,000 and HK\$6,824,000 respectively from the growing financial leasing business and the newly developed big data business, as well as an increase of approximately HK\$13,278,000 in the income from disposal of development properties as a result of further sale of shopping mall units in block B of Shantou Commercial Plaza during the year.

In addition to the new profit contribution from the financial leasing business mentioned above, the Group recognised income of approximately HK\$78,819,000 from the reversal of payables for convertible notes which became due in 2007 but have exceeded the effective limitation period of prosecution, and increase in fair value of financial assets at fair value through profit or loss amounting to HK\$41,015,000. Moreover, the Group received other incomes totaling approximately HK\$74,288,000 including government subsidies for relevant projects in relation to its development of the industrial park in Danzao. After deducting financing costs including interest expenses incurred by the development of the industrial park in Danzao and other projects and investments, depreciation of land use right assets and other factors, the Group still posted net profit of approximately HK\$79,912,000 for the year, representing a significant increase of 43.2% year-on-year.

FINANCIAL LEASING BUSINESS

In view of the increasing economic penetration of financial leasing driven by its growing demand from sustainable growth in China's economy and diversified financing models, the Group remains positive on the outlook of financial leasing sector in China based on rational risk management, despite the pressure from heightened bad debt risks amid the economic impact from the Sino-US trade tensions. Against this backdrop, the Group has been engaged in the operation and management of financial leasing business and gradually accumulated experience through Guangdong Financial Leasing Co., Ltd.* (廣東粵科融資租賃有限公司), a 25%-owned associate of the Group, and established a wholly-owned subsidiary Canton Risen Financial Leasing Co., Ltd.* (廣東粵盛科融資租賃有限公司) to further develop related business, which initially intends to focus on business areas including public utilities, environmental protection and energy conservation, new energy and telecommunication projects. Thanks to its rapid growth during the year, the segment recorded operating income of approximately HK\$80,531,000, representing a significant increase of 2.2 times year-on-year with operating profit of approximately HK\$35,457,000 which is expected to fuel the Group's future earnings growth.

* For identification purpose only

Furthermore, given the COVID-19 outbreak in early 2020 (the “coronavirus outbreak”), the Group carried out a series of inspections on its financial leasing customers to understand and track the fallout on delayed production resumption, product sales and collection of receivables, in a bid to mitigate adverse impact of the epidemic on relevant asset quality. Based on our current elevation, we believe that the existing customers are able to draw upon their sound fundamentals including stable cash flows, an indicator to resilience against the epidemic once it becomes under control, to survive the challenges with our aid at present. In this regard, the Group sees a sound picture of asset quality, and will keep a close eye on the assets under a well-established emergency response plan.

PROPERTY INVESTMENTS

The Group’s overall rental income in 2019 was approximately HK\$9,879,000, representing an increase of 45.7% year-on-year. As the ancillary facilities at China Holdings Building in Foshan and its surroundings were increasingly mature, the overall occupancy rate of China Holdings Building increased to approximately 90% and the rental income for the year amounted to approximately HK\$8,143,000, representing a significant increase of 71.22% year-on-year. As a majority of the properties of Shantou Commercial Plaza were sold out last year, its rental income for the year decreased year-on-year by 26.61% to approximately HK\$1,023,000. Huizhou International Commerce Building registered no rental income for the year as all its remaining properties were sold out early last year. As for the properties in Hong Kong sales, the rental income increased by 15.75% year-on-year to HK\$713,000 for the year, as a result of higher rent rate after the lease renewal.

In respect of property sales, the Group successfully completed the disposal of shopping mall units in block B of Shantou Commercial Plaza, cashing out a total of approximately HK\$30,378,000. It posted a slight loss of approximately HK\$524,000 from disposal of development properties for the year, as the disposal was made at a consideration slightly lower than book value.

With its solid position in the property development and investment sector and by capitalizing on experience in such fields, the Group established Guangdong Sino Rock Tyco Construction Co., Ltd.* (廣東中岩泰科建設有限公司) (“Sino Rock Tyco”), a 72%-owned joint venture of the Group, to develop the industrial park in Danzao Town, Nanhai District, Foshan City, the PRC, which is designed to house the main and spare production plants, pilot base, research and development center and ancillary facilities for new energy vehicles. In the first half of the year, we completed leasing the land right of approximately 1,400 Chinese acres for industrial park use, and commenced the site levelling. Subsequently, we will implement construction stage by stage depending on the actual situation. Meanwhile, we completed our plan on the acquisition of the Danzao Xianhuwan property, which was expected to be reconstructed into a research and development center and ancillary facilities for the park. We completed reconstruction of the exhibition hall in October 2019, while for other parts, reconstruction and fitting-out design were completed and the construction process will be started soon. The primary construction work for the industrial park is expected to be completed in 2020.

After the reporting period, the coronavirus outbreak in early 2020 might weigh on and bring down the Group's rental income amid potentially depressed economic sentiment. In addition, labor shortage due to the delayed production resumption as a result of epidemic control should affect the development and construction paces of our industrial park project in Danzao Town, leading to a potential delay in its completion schedule. Meanwhile, the epidemic may also drag down economic environment, thus mounting pressure to the industrial park in lease solicitation. The Group will make every effort in epidemic control, and take countermeasures to minimize its impact on operation and construction.

WELLNESS ELDERLY CARE BUSINESS

With the experience in building a smart platform for the management of integrated elderly care services in Nanhai District (the "Smart Elderly Care Services Platform"), Guangdong Yibaijian Comprehensive Health Technology Ltd.* (廣東壹佰健大健康科技有限公司) ("Guangdong Yibaijian"), a 100%-owned subsidiary of the Group, planned to gradually expand the exemplary Smart Elderly Care Services Platform to other towns in Nanhai District, aiming to develop platform in the surrounding areas of Foshan and even within and outside Guangdong Province. During the year, we proactively promoted the development of the Smart Elderly Care Services Platform in Shuangyashan, Heilongjiang, and helped Shuangyashan Civil Affairs Administration to complete inspecting the platform, which laid a solid foundation for the initiative of "walking out of Nanhai and facilitating surrounding areas". On 26 November 2019, the platform in Shuangyashan passed initial examination. Besides, the Group will further optimize the Smart Elderly Care Services Platform and ensure more efficient management with IT-based approaches. In addition, the Group will explore various value-added services for health management, such as referral and quality supervision of home elderly care services and relief, to diversify sources of operating income. The segment recorded operating income of approximately HK\$7,877,000, representing an increase of 78.8% year-on-year, and turned profitable with insignificant operating profit of approximately HK\$1,088,000 contributed to the Group.

At the same time, in accordance with the "Nanhai District Inclusive Elderly Care Service System" approved by the Nanhai District Government of Foshan City, the Group accelerated the restructuring and management transfer of the Nanhai District Social Welfare Center. In the first half of the year, we established a wholly-owned subsidiary Guangdong Taoyuan Comprehensive Health Operation Co., Ltd.* (廣東桃苑大健康產業運營有限公司) for investment, construction and operation of elderly care service system throughout the district. The Group also cooperated with Jiujiang Town to launch the first town-level elderly care service project in Nanhai District to manage investment and operation of Jiujiang Taoyuan Nursing Home* (九江桃苑頤養院). Despite numerous difficulties, Jiujiang Taoyuan Nursing Home was completed in an efficient manner, commenced operation on 26 June 2019 and began to offer quality service for elderly people from 1 July 2019. However, as no income was generated at the initial investment stage, it recorded an operating loss of approximately HK\$4,139,000.

After the coronavirus outbreak in early 2020, we stepped up our epidemic control efforts to minimize safety risk to the epidemic. In particular, various epidemic control measures were launched according to actual situation at Jiujiang Taoyuan Nursing Home, to ensure quality elderly care services for elderly people, a high-risk vulnerable group susceptible to the epidemic.

BIG DATA BUSINESS

In February of last year, the Group established a wholly-owned subsidiary Guangdong Sinsing Technology Ltd.* (廣東鑫興科技有限公司) to engage in industrial Internet project construction, smart city construction, big data operation and management and other businesses. Remarkable results were achieved in the year, as evidenced by the independent research and development of Industrial Internet Identification Public Service Platform. Equipped with SSL server credentials, the platform is able to provide identification application enterprises with reliable identification registration and resolution services, product tracing and demonstration, to facilitate business promotion and expand the scope of business. Besides, the proprietary Smart Elderly Care Services Platform co-developed with our fellow subsidiary Guangdong Yibaijian owns independent technical capability, enabling us to independently develop other projects without relying on other technological service providers and hence laying a solid foundation for growth upon our enhanced technical research and development capability. Also, we were recognised by the industry with the 2018 Outstanding Contribution Award from the Alliance of Industrial Internet. The segment recorded operating income of approximately HK\$18,881,000, representing an increase of 56.6% year-on-year, with insignificant net profit of approximately HK\$29,000.

HOTEL BUSINESS

Guilin Plaza (“Guilin Plaza”) stepped up promotion to exhibition customers, marketing through online platforms and offline marketing focusing on overseas tourist groups, tapped into new markets for more customers, and made the system more sensitive to market fluctuations and more quick and flexible for pricing adjustment. We took initiative to develop value-added services based on hardware with a view to maximizing operating income, seeking to expand the business portfolio. The average occupancy rate improved by 2.89% year-on-year, reaching 59.81%. Despite a 2.13% drop in average room rate, the operating income increased by 2.2% year-on-year to approximately HK\$13,519,000, and the operating loss narrowed by 8.5% year-on-year to HK\$5,504,000.

After the reporting period, China’s tourism industry suffered from the coronavirus outbreak in early 2020, particularly the city-wide quarantine policy, travel restrictions adopted by a number of cities in China, and public concerns about the epidemic. As a result, guest room marketing of Guilin Plaza was suspended until late March 2020. Even if the hotel reopens, the Group is not optimistic about its income in 2020.

In order to diversify businesses related to hotel operations, the Group established China Select Small Hotel Union Limited, a 51%-owned subsidiary of the Group, with T-Box Union (China) Financial Holdings Investments Limited and T-Box Union Investments Limited, in an effort to provide integrated service in the homestay inn and small hotel industry, including the provision of quickly-constructed T-BOX® mobile homes with zero-sewage discharge environmental-friendly systems, direct sale management software and financing solutions. Based on the future-oriented interdependent business model and with the dawn of the 5G era, the year witnessed the establishment of Duoduo Meisu* (多多美宿直賣), a domestically leading direct sale platform for scenic homestay inns, with the online market promotion and brand awareness work under way. As the business was still in initial promotion, it posted an operating loss of approximately HK\$1,506,000, narrowing by 58.6% year-on-year.

PROFIT FROM INVESTMENTS IN ASSOCIATES

Nanhai Changhai Power Company Limited* (南海長海發電有限公司) (“Changhai Power”), a 31.875%-owned joint venture of the Group, recorded a cost reduction due to the lower coal prices in the year, which improved the operating performance with an operating profit of approximately HK\$229,700,000, thus contributing earnings of approximately HK\$73,564,000 to the Group, representing an increase of 16.46% year-on-year.

As Guangdong Financial Leasing Co., Ltd.* (廣東粵科融資租賃有限公司), a 25%-owned associate of the Group, faced the problem of bad debts in this year and substantial reduction in revenue and operating profit, the Group made a decision on disposal and entered into an agreement on asset sale on 30 September 2019. The transaction is still processing due to the coronavirus outbreak and the Group received the partial consideration in January 2020. For the period ended 31 October 2019, Guangdong Financial Leasing Co., Ltd. recorded operating profit of approximately HK\$26,250,000, and contributed earnings of approximately HK\$6,562,000 to the Group.

On 20 August 2018, Foshan City Nanhai Canmanage Investments Holdings Limited* (佛山市南海康美投資有限公司) (“Nanhai Canmanage”), a wholly-owned subsidiary of the Group, completed its investment in 49% of Guangdong Tiannuo Civil Explosives Co., Ltd.* (廣東天諾民爆有限公司) (“Tiannuo”), and on 9 October 2018, Tiannuo completed the acquisition of Guangdong Nanhong Chemical Co., Ltd.* (廣東南虹化工有限公司) (“Guangdong Nanhong”). The transactions allow the Group to improve its profitability and explore the potential of the domestic civil explosive business. Due to the impact on its business results from a technological modification project in the year, Tiannuo only recorded a profit of approximately HK\$8,627,000 for the year after depreciation adjustment for fair value of the assets acquired, and contributed earnings of approximately HK\$4,228,000 to the Group.

After the reporting period, some workers were unable to return to work as scheduled, mainly due to the coronavirus outbreak in early 2020, delayed production resumption after the Lunar New Year holidays, suspended or limited transportation in certain domestic cities, and the 14-day quarantine requirement on workers who left from other “high-risk” provinces before permitted to return to work. As a result, Changhai Power was weighed on by weaker demand, as some customers of its power supply and steam heating business have yet to resume normal operations, which is expected to affect its business results in 2020. Also, Tiannuo needs to postpone its resumption of operations till 27 February 2020, which may have an impact on its business results in 2020.

FINANCIAL POSITION AND ANALYSIS

As at 31 December 2019, the Group had total assets of HK\$5,147,666,000 (31 December 2018: HK\$3,460,537,000), total liabilities of HK\$3,441,696,000 (31 December 2018: HK\$2,129,217,000), a gearing ratio (being total liabilities divided by total assets) of 66.9% (31 December 2018: 61.5%), net assets of HK\$1,705,970,000 (31 December 2018: HK\$1,331,320,000), and equity attributable to owners of the Company per share of HK64.54 cents (31 December 2018: HK58.00 cents).

The Group had net current assets of HK\$505,514,000 (31 December 2018: HK\$212,713,000), a current ratio (being current assets divided by the current liabilities) approximately 1.36 times (31 December 2018: 1.15 times) and the bank balance and cash of HK\$1,028,396,000 (31 December 2018: HK\$1,221,671,000), which are sufficient for capital requirements for future operation and new projects or business development of the Group.

PLEDGE OF ASSETS

As at 31 December 2019, properties of the Group for own use and investment, bank deposits, entity interest of a subsidiary and finance lease receivables with a carrying value of approximately HK\$1,906,513,000 were pledged to banks as the security for the bank borrowings granted to the Group (31 December 2018: properties of the Group for own use and investment, bank deposits and finance lease receivables with a carrying value of approximately HK\$899,816,000 were pledged to banks).

FOREIGN EXCHANGE EXPOSURE

The Group's main operating income and costs are denominated in RMB. In the business operation of the Group, foreign exchange fluctuation of income and costs would be mutually offset. However, as the Hong Kong-based Group has injected a substantial amount of current borrowings into domestic wholly-owned subsidiaries in Mainland China and held a huge amount of monetary assets denominated in RMB, an exchange gain or loss would generate from the appreciation or depreciation of RMB. It is expected that an increase or a decrease of approximately HK\$8,126,000 in the Group's profit for the year would be resulted if the exchange rate of RMB to HKD appreciates or depreciates by 5%. Over the few past years, RMB constantly showed an upward trend and gradually became stable in the second half of 2008. Nevertheless, RMB started to fluctuate upward and downward repeatedly in recent years. With the Sino-US trade war occurred last year, the exchange rate of RMB against USD dropped sharply, and has gradually become balanced and fluctuated in both directions in the first half of the year. However, the Sino-US trade war intensified abruptly in August 2019, resulting a remarkable drop in exchange rate of RMB against USD and an exchange loss of approximately HK\$5,194,000 incurred by the Group. The Board believes that RMB will be immensely affected by any change in the Sino-US trade war in the short term. A turnaround in the Sino-US trade war may lead to a rapid rebound, therefore the trend of RMB is unforeseeable in the short term. Though in the long run, it is expected that RMB will become stable and will not expose the Group under significant and long term adverse foreign exchange risk. Accordingly, it is not necessary for the Group to hedge against foreign exchange risk at the moment.

OUTLOOK

With experience accumulated during the course of transformation and upgrade over past years, the Group has generally set its focus and direction for development. To seize opportunities of market development, the Group will strive to adjust and optimize its businesses, shifting to segments such as industrial parks/property development and investment, financial service, technology and wellness elderly care. In respect of the property development and investment, with our solid position in the property development and investment sector and by capitalizing on experience in such fields, the Group will continue to develop the new energy industrial park in Danzao Town, Nanhai District, Foshan City, China. In respect of the financial service sector, drawing upon the increasing demand for finance lease amid China's economic growth and changes in financing models and in view of the fallout of the Sino-US trade war and the coronavirus outbreak, the Group will further develop the financial leasing business and intends to focus on business areas including public utilities, energy conservation and environmental protection, new energy and telecommunication projects, while being cautious to risk management. In respect of the technology sector, by taking advantages of the opportunities arising from the new smart city construction plan in Nanhai District, the Group will continue its research and development efforts in the Big Data industry projects on an independent basis, as a main driver to our profit growth in the future. In the wellness elderly care sector, based on the Smart Elderly Care Services Platform, the Group will expand to cover other wellness elderly care services. After establishing the first institutional elderly care project in the first half of the year, the Group will continue to head in the direction of institutional elderly care business and the development of a 3-tier elderly care system comprising institutes, communities and households in Nanhai District. Meanwhile, the Group will, through its joint ventures and associates, participate and invest in power generation, civil explosives, and other high-growth industries in the PRC. With the aforesaid business development directions, the Group will be able to expand its business and gradually achieve the goal of increasing and maintaining stable returns for shareholders.

Moreover, addressing the coronavirus outbreak in early 2020, the Group will take decisive countermeasures to minimize the impact on operation and development in addition to effective epidemic control to mitigate safety risk.
