**THIRD QUARTERLY RESULTS ANNOUNCEMENT
FOR THE NINE MONTHS ENDED 31 MARCH 2018**

**CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF
HONG KONG LIMITED (THE “STOCK EXCHANGE”)**

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

In the Reporting Period, the Group has adopted new or revised HKFRSs issued by the HKICPA which are relevant to Group’s operations and effective for the Group’s financial statements for accounting period beginning on or after 1 July 2017. The adoption has no significant changes on the Group’s reported results and the financial position of the Group for the current or prior accounting periods. The Group has not applied any new or revised HKFRSs that is not yet effective for the Reporting Period. For those which are not yet effective and have not been early adopted, the Group is in the process of assessing their impact on the Group’s results and financial position.

These unaudited condensed consolidated financial statements have been reviewed by the audit committee of the Company.

Except as described below, the accounting policies and methods of computation used in the condensed consolidated financial statements for the nine months ended 31 March 2018 are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 30 June 2017.

Equity-settled share-based payment transactions

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 7 to the condensed consolidated financial statements.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straightline basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity (share option reserve).

At the end of the reporting period, the Company revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the estimates during the vesting period, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimates, with a corresponding adjustment to share options reserve.

For share options that vest immediately at the date of grant, the fair value of share options granted is expensed immediately to profit or loss. When share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to retained earnings.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services rendered, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the services.

3. REVENUE AND SEGMENTAL INFORMATION

BUSINESS REVIEW AND OUTLOOK

The Group is principally engaged in general building works and specialised building works in Hong Kong. We generate revenue by provision of general building works and specialised building works which are contracted by our customers on project basis.

During the period, competition in construction market is particularly keen. The Group is facing the ever largest competition in tendering projects. Despite that the Group has lower down its profit margin to make a tender for the projects, the success rate of getting new projects is low. In view of the exceptional low margin tendered projects in the market, the Directors consider that there are new comers to the market requiring sufficient business to support. With a healthy financial position, the Group insists to maintain a reasonable profit margin to make a tender project and will not compete with the unreasonable bids with the risk of running at an operational loss.

With the Group's experienced management team, long-term relationship with customers and creditability in the market, the Directors consider that the Group is well-positioned to compete against its competitors and the Group will continue to adhere to our one-stop-shop strategy and prudent financial management. We are confident that we could undertake some new projects with better margins in coming days. Under the current exceptional keen competition in the construction market, the Directors may also consider other investment opportunities to broaden the base of the return of the Group and to maximize the returns to shareholders. In doing so, the Directors will bear in mind the associated risk of any potential investment.
